

Product Application

AFA Style 99 rubber expansion joints consists of 99SF, 99TF, 99SSF, 100SF-M, 99TU, 99SSFTR, 99SSHDC, 99TUF, 99SFC, 99TFC, 100SFC-M, 99SFA, 99TFA, 99TUA, 99SFAC & 99TFAC.

They are widely used to absorb piping and pumping equipment from movement, isolated vibration, reduce systems noise and compensate for misalignment.

Their special features will also eliminate electrolysis, counter expansion and contraction against start up surge forces.

AFA STYLE 99 RUBBER EXPANSION JOINT

Product Application

AFA Style 99 rubber expansion joints are being widely used in piping and pumping application in the the following industries.

- Suction and delivery pumping lines for air - conditioning, ventilation system and chilled water installation.
- Cooling tower and fan coil unit piping lines.
- Fire fighting and sanitary system.
- Pollution control system for sewerage and water treatment.
- Power generation plant, marine cooling system, ballast lines, paper industry, etc...
